INNOVATION STATION

Collaboration Station is excited to introduce Innovation Station classes! These dynamic, interactive classes combines creativity, technology, and problem-solving through hands-on activities that engage individuals in building, coding, designing, and inventing. In a fun and collaborative environment, individuals will work on various projects, developing both technical and creative skills while learning to think critically and innovate.

- Students will use materials such as Lego, robotics kits, and iPads to create working models, vehicles, or structures.
- Students will learn to code using beginner-friendly platforms, helping them understand logic and sequencing while designing interactive games, animations, or even robots.
- Students will team up to tackle challenges like creating a bridge that holds weight, building a robot to navigate a maze, or designing a solution to a real-world problem, such as improving energy efficiency.

**Classes will meet weekly for eight weeks for one-hour sessions.
The cost is $75.00 per class.**
